The Deer Tracks - Undersvik

The Deer Tracks are back after three years of silence with the new album **Undersvik**. After the bands constantly touring of the world for several years, they ended up in a mental and spiritual dead end. The interruption of touring was vital and the band sought out an abandon school in the small village Undersvik, Sweden. Over a 10 days period, with outside world switched off, they just let the stillness and their own spirit color the lyrics and their sound. Undersvik is as much a result of the eternal insomnia of touring, as the tranquility and beauty of nature.

The **Gävle** band, The Deer Tracks, consists of **Elin Skeppstedt** (F.D. Lindfors) and **David Lehnberg**. The band has released four albums and the music has been heard in hit TV shows like **Grey's Anatomy**, **Suits** etc. Touring has been intense with several long US and Asian tours. 'Undersvik' released on indie label Lamour Records as of 3 years established itself as one of the most interesting new Swedish labels with a musical spectra from ambient and art music to revival-acid and information techno. And now The Deer Tracks northern light electronica.
